

LG INTRODUCES NEW LINE OF COMMERCIAL LAUNDRY SYSTEMS
Boasting highest water and energy efficiency in the industry

Plainview, N.Y., May 25, 2010 – LG, a leading manufacturer of innovative, state-of-the-art electronics and appliances and top-seller of domestic front load washers in the U.S., today announces production of its second generation Commercial Laundry equipment. The new line, Giant C, is available through its exclusive distributors, Coinmach Corp., the nation's leading multifamily laundry provider and ASI Campus Laundry Solutions, the premier supplier of campus laundry solutions serving colleges and universities.

The new line includes LG's highest efficiency front load washer with an industry leading Modified Energy Factor of 2.60 and a Water Factor of 3.65. In addition to its front load washers, the line also features new stackable and single, stand alone dryers. All models are available with either card or coin controls.

The new product will be available for delivery starting June 1, 2010.

Mike Stanky, Coinmach COO, and David Goldenberg, ASI President, inspect LG Commercial Washer production line.
